Some of our products may release traces of formaldehyde. The actual values found depend on the measuring conditions and the details of the production process used to produce leather.

Smit & Zoon offers low-bisphenol and bisphenol-free products. We know that some unreacted Bisphenol-S can be found in a selective range of our products. The value is reported in the product Safety Data Sheet when appropriate. Smit & Zoon is phasing out bisphenol-containing products in line with the evolving regulations.

If you have any further questions please do not hesitate to contact us.
